

# SHRI RAMSWAROOP MEMORIAL UNIVERSITY

## End Semester Examination (2021-22)-Odd Semester

### M.Sc. (Physics) – I Year (I Sem.)

**Course Name: Mathematical physics-I**

**Code: MPH1002**

**Time: 02 Hours**

**Max Marks: 60**

**University Roll No.**

(To be filled by the Student)

**Note: Please read instructions carefully:**

- a) The question paper has 03 sections and it is compulsory to attempt all sections.
- b) All questions of Section A are compulsory; questions in Section B and C contain choice.

| <b>Section A: Very Short Answer type Questions</b> |  | <b>BL</b> | <b>CLO</b> | <b>Marks (10)</b> |
|--|--|-----------|------------|-------------------|
| <b>Attempt all the questions.</b>                  |  |           |            |                   |
| 1.   | Write down the Cauchy-Riemann equation in polar form.  | BL1       | CLO1       | 02                |
| 2.   | Expand $\log z$ in a Taylor's series about $z = 1$ .   | BL2       | CLO2       | 02                |
| 3.   | State Convolution theorem on Fourier transform.  | BL1       | CLO3       | 02                |
| 4.   | Find the Laplace transform of Unit step function.  | BL3       | CLO3       | 02                |
| 5.   | Define the basis for a vector space.   | BL1       | CLO3       | 02                |
| <b>Section B: Short Answer Type Questions</b>      |  | <b>BL</b> | <b>CLO</b> | <b>Marks (30)</b> |
| <b>Attempt any 03 out of 05 questions.</b>         |  |           |            |                   |
| 1.   | Show that the following function is harmonic and find its harmonic conjugate.<br>$v = \sinh x \cos y$                                | BL5       | CLO1       | 10                |
| 2.   | Calculate the value of $L \left[ \int_0^{\infty} \frac{1}{t} e^{-2t} \sin t \right]$   | BL5       | CLO2       | 10                |
| 3.   | Find the Fourier sine and cosine transforms of<br>$f(x) = \begin{cases} 1, & 0 < x < a \\ 0, & x > a \end{cases}$                    | BL3       | CLO3       | 10                |
| 4.   | Show that row vectors of the matrix $\begin{bmatrix} 1 & 2 & -2 \\ -1 & 3 & 0 \\ 0 & -2 & 1 \end{bmatrix}$ are linearly independent. | BL5       | CLO3       | 10                |
| 5.   | Prove that the eigen values of symmetric second order tensor are real.   | BL2       | CLO4       | 10                |

| <b>Section C: Long Answer Type Questions</b><br><b>Attempt any 01 out of 04 questions.</b> |   | <b>BL</b> | <b>CLO</b> | <b>Marks (20)</b> |
|--|---|-----------|------------|-------------------|
| 1.   | Evaluate the following integrals by contour integration:<br>$\int_0^{2\pi} \frac{\cos 3\theta}{5 - 4\cos\theta} d\theta$                      | BL4       | CLO1       | 20                |
| 2.   | Examine for linear dependence [1, 0, 2, 1 ], [3, 1, 2, 1 ], [4, 6, 2, -4 ], [-6, 0, -3, -4 ] and find the relation between them, if possible. | BL5       | CLO2       | 20                |
| 3.   | Using the Laplace transform, find the solution of the initial value problem:<br>$y'' + 25y = 10 \cos 5t$<br>$y(0) = 2, y'(0) = 0$             | BL3       | CLO3       | 20                |
| 4.   | Using Parseval's identity, prove that:<br>$\int_0^{\infty} \left( \frac{\sin t}{t} \right)^2 dt = \frac{\pi}{2}$                              | BL5       | CLO4       | 20                |

-----
